## About Us:

We make sustainable, non-burn technologies that have a place in our world's future. We're family owned and operated with a talented team of engineers, scientists, and fabricators. Our state-of-the-art equipment is made in our hometown of Danville, Indiana. It's an honor to grow our global company in a community of our friends.

Our Aquamation systems are changing the funeral profession. Aquamation is a gentle, water-based alternative to flame cremation available for our pet and human loved ones. Small

# EMERALD SPONSORS

businesses like funeral homes and pet crematories are able to make a living off of our equipment, and we're proud to help them serve their communities. Aquamation uses 90% less energy than flame cremation and does not emit any harmful greenhouse gases.

Our sterilization systems are changing the scientific industries with solutions that reduce and recover energy. Because we're experts in biosafety, chemistry, engineering, and fabrication—we're able to help facilities find the best way to treat their liquid and solid waste streams.

*All of our work aligns with a ONE HEALTH philosophy. We believe that realistic, effective, and sustainable solutions protect animal, human, and environmental health.*

Advanced Composting Technologies  
Address: 1210 East Vermeer Road, Pella, Iowa  
50219

Phone: (828) 230 – 1729

URL: <https://advancedcomposting.com>

## **About Us:**

Advanced Composting Technologies has quickly become a technology and process leader in the industrial composting sector with installations that span many sectors including all varieties of farm/agricultural, food service, and specialty organic waste systems. The composting systems that ACT builds today were developed and refined through a process of extensive research, testing, and real-world installations. Our close coordination with the Department of Agriculture’s Natural Resources Conservation Service (NRCS) has led to approvals on design, confirmation of environmental stewardship, and even significant cost sharing programs implemented across specific markets. In 2009 ACT received the distinguished Innovate Business Award from the Asheville Chamber of Commerce for the thought leadership and business process change our systems and technology deliver.

Our Forced-Air, Closed Loop composting systems deliver robust, high-volume systems that have many cost, operational, and environmental benefits. We continue to deliver the “Down to Earth” business practices that help make our composting solutions affordable and customized for each market or installation.
